DETAILED ACTION

Claim Rejections - 35 USC § 103

1. Claims 1-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cook in view of Weder as discussed in the previous office action.
2. Applicant's arguments filed 3/23/2005 have been fully considered but they are not persuasive. In response to applicants arguments regarding primary reference Cook, Cook does show the sheet moving from one position to another as shown in figure 13. Cook discloses that the sheet can be a flat condition as well (col 3 lines 20+) which reads on a first unfolded position and a second folded position. The examiner is interpreting means 70, 78 to read on separate molds as claimed. These means do define distinct lines as claimed as shown in the figures wherein mold means 78 form the corner lines as shown in figure 13c and mold means 70 form the configuration shown in fig 13b. These two figures show distinct lines as claimed. The final configuration is shown in fig 13d wherein the fold lines are folded to form the final configuration.

Regarding claim 2, figure 13b shows a partially folded position between the first fig 13a and second folded position 13d.

Regarding claim 3, mold means 70, 78 are substantially two dimensional as claimed.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5

Art Unit: 3721

USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992).

In this case, the primary reference, Cook discloses that the folding systems can be used on other materials besides maps (col 1 lines 10+) and Weder discloses the use of die molds to form flower wraps (col 1 lines 42+). Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide Cook with flower wrap and indicia means as taught by Weder to use the folding system of Cook in other known materials besides maps.

The examiner also notes that the test for obviousness is not whether the features of a secondary reference may be bodily incorporated into the structure of the primary reference; nor is it that the claimed invention must be expressly suggested in any one or all of the references. Rather, the test is what the combined teachings of the references would have suggested to those of ordinary skill in the art. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981).

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
